

10. STABILITY AND REACTIVITY

Stability

Stable under normal conditions.

Polymerization

Hazardous polymerization does not occur.

Hazardous Decomposition Products

Carbon monoxide, irritating aldehydes, ketones and unidentified organic compounds may be formed during combustion.

Incompatible Materials

Strong oxidizers, acid chlorides and acid anhydrides, halogens, especially calcium hypochlorite (contact with it may cause fires and explosions). Hot phenol attacks copper, aluminum, magnesium, lead, and zinc.
