

50 Year Calendar - 2010-2070

for personal use only - as per Glowforge forum rules

Use proofgrade medium basswood ply for the circles; thick basswood ply for the post in the middle.

Set red to cut; green to score; black to engrave. note: you'll need to toggle a few steps to the correct settings.

For the bottom layer front and back; set the blue step to ignore; set the central pivot (purple) to engrave with 2 passes and run job; then carefully flip over without moving the sheet or the design; set blue to engrave and all the other steps to ignore, print.

To assemble: lightly tap the post in the bottom. Slide the top over it and put a small dab of glue on the post. Glue the gear on top.
